

BLOOD TRACING

PM Labels Limited

PM Labels Limited; offering labelling and wristband solutions to the National Health Service

Blood Safety Tracking Tags

Whilst many thousands of blood transfusions are carried out without incident, mistakes can occur that can have serious implications to a patient.

The Blood Safety Tag enables final checks to be made prior to the blood being infused.

The Tag allows the Patient's name, Hospital Number and DOB to be checked and ensure they correspond with the information on the Tag. Simple checks can prevent further errors in this critical area.

The Tags are fan-folded and are suitable for printing via a Thermal Transfer printer. The Tag incorporates a self adhesive label that offers a further audit trail.

The high quality card also has a punched hole and a reinforcing strip to ensure the Tag doesn't become unattached from the bag accidentally.

The Tags are attached to the bag using a security seal; our sales team will advise you on the best seal to use for this application.

Total solutions are available from PM Labels, we supply printers and consumables in order to offer our clients a single source solution. Our experienced NHS sales team will be happy to discuss your requirements in detail.

Our range of standard and bespoke NHS solutions are shown on our website; www.nhslabels.co.uk

Our NHS FREEPHONE line is 0500 503350, we look forward to hearing from you.
