

PATHOLOGY BAGS

PM Labels Limited

PM Labels Limited; offering labelling and wristband solutions to the National Health Service

Outer Bags

Over the last 5 years PM Labels have added to the range of products that we offer the NHS.

For over 20 years we have been supplying a wide range of labelling solutions tailored to the NHS, extending the range to include polythene products was a natural progression.

Polythene bags are used extensively with a number of departments, Pathology is no exception.

Outer bags offer numerous benefits to the department. Individual samples can be placed in the outer bag to ensure that request do not get lost on their way to the laboratory. More

importantly the bag greatly reduces the risk of spillage if a sample becomes damaged in transit.

Patient confidentiality can be better protected when samples are placed within an outer bag.

The film is available in a wide range of options; clear or coloured to suit the department's needs. Printing can be added to both the front and back of the bag in addition to "write on" panels or designated areas to stick labels.

The bag can be sealed either by using a peel and seal self adhesive closure, grip seal

closures or punch of plastic hands.

A gusset can be added to offer the bag greater capacity.

Depending on the size of the bag the gauge of film we use can vary.

Absorbent pads can be added to assist with internal spillage. The absorbency capacity of the pads can be inserted to best suit your particular needs, our Sales Team can offer you advice on the if needed.

We can make a bag to suit your exact needs, call us on FREEPHONE 0500 503350 or visit www.nhslabels.co.uk
