

PATIENT ID WRISTBANDS

PM Labels Limited

PM Labels Limited; offering labelling and wristband solutions to the National Health Service

A safe and controlled solution to Patient Identification

As outlined in recent NPSA guidelines Patient Identification has been in need of upgrading to a universally recognised standard for sometime. Different practices have been used by different Trusts causing confusion and on occasions expensive errors.

Within our Group we have extensive experience of the wristband market and supply over 25 million wristbands into the UK Leisure and Event industry.

The medical wristbands have been developed as an extension of an existing product that is well established within the UK market.

Our direct thermal medical wristbands have been designed with safety and simplicity in mind. The wristband has a Biocote anti bacterial coating on the reverse to dramatically reduce the risk of spreading infection.

The water resistant permanent self adhesive seal offers a simple but highly effective closure to the band.

The face material has been coated to prevent any of the printed information on the wristband becoming impaired when coming into contact with alcohol gels and other solvents.

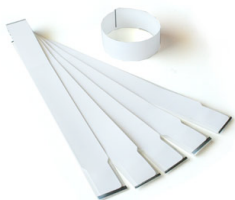

The PM Labels wristband solution will work in conjunction

with most UK sourced direct thermal desktop printers. The wristband itself is the only consumable needed, no ink, no ribbons, no cartridges.

The wristbands are available in plain white and also a Red Allergy version (as shown). The wristbands measure 25mm x 275mm and come in rolls of 200 bands. Between each band is a perforation to allow easy dispensing.

PM Labels Limited is an approved supplier to NHSSC.
